SUMMARY

Full Stack Developer and AI Engineer with hands-on experience building multi-agent AI systems, 3D interactive portfolios, and production-ready SaaS platforms. Skilled in React, Next.js, FastAPI, TypeScript, and Python with deep focus on agentic AI workflows, semantic search, browser automation, and real-world product development.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, React Three Fiber, Three.js, Tailwind CSS, Framer Motion, shadcn/ui

Backend: FastAPI, Node.js, Express.js, REST APIs

Databases: PostgreSQL, Supabase, pgvector, MySQL

AI & Automation: Groq API, Llama 3.3, sentence-transformers, OpenAI API, Playwright

ML & CV: OpenCV, CNN, Image Processing

Deployment & Tools: Git, GitHub, Vercel, Postman, VS Code

Core: Data Structures, DBMS, OOPs, API Design, Multi-Agent Architecture, Semantic Search

EXPERIENCE

Independent Full Stack Developer & AI Engineer | 2025 – Present

- Multi-agent AI pipelines with autonomous job discovery, semantic scoring, and HITL workflows (FastAPI, Supabase, Groq)
- Production SaaS with Next.js, FastAPI, and pgvector for AI-driven career tooling and semantic search
- Immersive 3D portfolios using React Three Fiber, Three.js, and custom GLSL shaders
- Vercel-deployed apps with Playwright automation across LinkedIn, Indeed, and Internshala

PROJECTS

AI Job Agent – Autonomous Job Application Platform | https://github.com/Rishabh02104/AI_Job_Agent

Tech: FastAPI, Next.js, Supabase, pgvector, sentence-transformers, Groq, Playwright, TypeScript

- Built a full-stack multi-agent pipeline with 6 specialized agents (Job Scout, Scorer, Resume Optimizer, Cover Letter, Packager, Tracker) orchestrated through a custom pipeline with human-in-the-loop review gate
- Implemented semantic job matching using all-MiniLM-L6-v2 embeddings in Supabase pgvector, achieving cosine similarity scoring between resume and job description vectors
- Integrated Gmail API to auto-detect interview invites, rejections, and offers and update application status in real time
- Automated applications on Internshala, Indeed, and LinkedIn via Playwright with a daily digest email of submissions and responses

CareerForge AI – AI Career Platform | <https://careerforge-ai-red.vercel.app/>

Tech: Next.js, FastAPI, PostgreSQL, Playwright, TypeScript, Groq, Tailwind CSS, shadcn/ui

- Developed a production SaaS platform for AI-driven job discovery, resume analysis, mock interviews, HR question bank, and career roadmap generation
- Integrated Groq API with Llama 3.3-70b across 6 AI features including resume evaluator, mock interview system, and personalized career recommendations
- Built Playwright browser automation for multi-platform job application assistance across LinkedIn, Indeed, Internshala, and Unstop
- Deployed on Vercel with a full responsive dashboard, animated custom cursor system, and real-time AI feedback

Secure Voting – Tamper - Proof Digital Voting System | <https://secure-voting-iota.vercel.app/>

Tech: Next.js, TypeScript, Tailwind CSS

- Built a secure digital voting platform with tamper-proof ballot submission and real-time result tracking
- Designed and deployed a clean voter-facing UI with authentication flow, candidate selection, and transparent result display
- Focused on security-first architecture ensuring vote integrity and preventing duplicate submissions

EDUCATION

B.Tech – Computer Science and Design | Indrashil University | 2022 – 2026
